**Course Contacts**

**Instructor:** Leafia Ye  
**Email:** lye.teaching@gmail.com  
**Office Hours and Location:** Thursday 2-3 pm on Zoom:  
https://utoronto.zoom.us/j/85117011249

**Course Overview**

Provides students with the opportunity to develop an understanding of the logic of multivariate analysis by applying various strategies for the analysis of complex multivariate data. Restricted to sociology majors and specialists.

Provides students with the opportunity to develop an understanding of the logic of multivariate analysis by applying various strategies for the analysis of complex multivariate data. Restricted to sociology majors and specialists.

**Course Learning Outcomes**

Upon successful completion of the course, students will be able to apply various quantitative methods, correctly interpret statistical outputs, and critically evaluate sociological research that uses regression.

**Prerequisites:** SOC202H1  
**Corequisites:** None  
**Exclusions:** SOC300H1, ECO220Y1, PSY202H1, STA221H1  
**Recommended Preparation:** SOC150H1
**Credit Value:** 0.5

**Course Materials**

**Text**

Week 1: Introduction: what is regression analysis?
No required readings.

Week 2: Simple linear regression
Thrane Ch. 1 and 2.

Week 4: Multiple regression
Thrane Ch 3.

Week 4: Samples, populations, and significance
Thrane Ch 4.

Week 5: Assumptions of regression analysis
Thrane Ch 5.

Week 6: Mid-term exam

Week 7: No class – reading week
Guidelines for data analysis project will be posted.

Week 8: Mediation and moderation
Thrane Ch 6.

Week 9: Logistic regression
Thrane Ch 7.

Week 10: Ordinal logistic regression
Thrane Ch 8.

Week 11: Instrumental Variable
Thrane Ch 9.

Week 12: Multilevel modeling

Week 13: Final exam

**Marking Scheme**

<table>
<thead>
<tr>
<th>Assessment</th>
<th>Percent</th>
<th>Details</th>
<th>Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quizzes</td>
<td>15%</td>
<td>You will complete three quizzes on Quercus that test what you learned from the readings (both textbook and academic articles) and during lectures. Quizzes are open-book, untimed, and allow multiple attempts. You must complete them independently, and each quiz is worth 5% of your grade.</td>
<td>2024-01-24,2024-02-07,2024-03-13</td>
</tr>
<tr>
<td>Mid-term exam</td>
<td>25%</td>
<td>You will be given a mid-term exam in class on February 15 to test your knowledge in the first five weeks of the course. The exam is close book and can cover readings (textbook, academic articles) as well as lecture content.</td>
<td>2024-02-15</td>

<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>-----------</td>
</tr>
<tr>
<td>Final exam</td>
<td>25%</td>
<td>You will be given a final exam in class on April 4 to test your knowledge in the entire course. The exam is close book and can cover readings (textbook, academic articles) as well as lecture content. Although the final exam is cumulative, there will be an emphasis on topics in the weeks after the mid-term exam.</td>
<td>2024-04-04</td>
</tr>
<tr>
<td>Data analysis project</td>
<td>30%</td>
<td>You will complete a data analysis project to apply the methods you learned in this course. Specifically, you will use Stata to analyze actual survey data to answer a social science research question. The final product will be a 1500-word essay with an introduction and background, data and methods, results, and conclusion. You project will be evaluated on the significance of the question, the sufficiency of your explanation of methods, the rigor of the data analysis, and the quality of your interpretation of the analysis. While you should conduct original research and complete the analysis independently, it is normal and expected for you to discuss your data analysis project with your classmates.</td>

<td>---------------</td>
</tr>
<tr>
<td>Tutorial participation</td>
<td>5%</td>
<td>The tutorials serve as supplements to weekly lectures. The two main goals of tutorials are to 1) solidify your understanding of the material (including Q&amp;A on quizzes and the mid-term), and 2) prepare you with the necessary programming skills (in Stata) for the data analysis project. It is important that you consistently attend and actively participate in tutorials, and you will be graded by your TA on your performance.</td>
<td>No Specific Date</td>

**Late Assessment Submissions Policy**

Late submission deduction for quizzes and the data analysis project is 10% per day. For example, if the deadline is on Monday (11:59 pm) and you submitted your assignment on Tuesday at 9 am, then we will multiply your grade by 0.9; if you submitted your assignment on Wednesday at 1 pm, then we will multiply your grade by 0.8, and so on. Assignments that are late by 7 days or more will receive a mark of zero. You do not need to contact us if an assignment is late; the grader will apply the penalty. If you have either a medical reason or a severe personal circumstance that prevents you from completing an assignment, please take the following steps: Students who are late in submitting an assignment for medical reasons need to email the professor (not the TA), and also declare their absence on the system (ACORN). This can only be used ONCE during the semester. Students who are late in submitting an assignment for other severe circumstances, such as a family or other personal emergency, should request their College Registrar to email the instructor.

**Policies & Statements**

**Plagiarism Detection Tool**

Normally, students will be required to submit their course essays to the University's plagiarism detection tool for a review of textual similarity and detection of possible plagiarism. In doing so, students will allow their essays to be included as source documents in the tool's reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University's use of this tool are described on the Centre for Teaching Support & Innovation web site ([https://uoft.me/pdt-faq](https://uoft.me/pdt-faq)).

**Academic Integrity**
All suspected cases of academic dishonesty will be investigated following procedures outlined in the Code of Behaviour on Academic Matters (https://governingcouncil.utoronto.ca/secretariat/policies/code-behaviour-academic-matters-july-1-2019). If you have questions or concerns about what constitutes appropriate academic behaviour or appropriate research and citation methods, please reach out to me. Note that you are expected to seek out additional information on academic integrity from me or from other institutional resources. For example, to learn more about how to cite and use source material appropriately and for other writing support, see the U of T writing support website at http://www.writing.utoronto.ca. Consult the Code of Behaviour on Academic Matters for a complete outline of the University's policy and expectations. For more information, please see A&S Student Academic Integrity (https://www.artsci.utoronto.ca/current/academic-advising-and-support/student-academic-integrity) and the University of Toronto Website on Academic Integrity (https://www.academicintegrity.utoronto.ca).
