We know only a single science, the science of history. One can look at history from two sides and divide it into the history of nature and the history of men. The two sides are, however, inseparable; the history of nature and the history of men are dependent on each other so long as men exist.

Marx & Engels (1845)

Every social science—or better, every well-considered social study—requires an historical scope of conception and a full use of historical materials.

C. Wright Mills (1959)

SYNOPSIS:

Can the major constraining dichotomies and polarities that have skewed the history of the social sciences over the past two centuries—voluntarism/determinism, agency/structure, nominalism/realism, micro/macro, objectivism/subjectivism, nomothetic/idiographic, maximizing rationality/cultural specificity—be resolved and transcended through use of a contextual-sequential logic of explanation, as offered in Historical Sociology? In an effort to answer that question, we will examine the central ontological and epistemological issues and controversies raised by recent efforts to develop a fully *historical social science*, a fully *sociological historiography*.

We will open with a review of the celebrated *Methodenstreite* that shaped the formation of the social science disciplines in the late 19th and early 20th centuries—disputes that turned heavily on disagreements regarding the proper relationship between historical inquiry and sociological theorizing. The program of positivism—to model social science after the nomological natural sciences—gained institutional ascendancy, and history was driven to an “external” and largely “auxiliary” status within disciplines such as sociology and economics. Nomological-deductive modes of explanation, abetted by the probabilistic logic championed by statistics and sundry technical advances in quantitative methods, defined the grounds of proper theorizing. Hermeneutics, genealogy, and narrative—the analytical “logics” of historiography—were deemed preliminary to full scientific explanation, which sought to specify the determinant relations of social forces and variables “abstracted from” or independent of time and place considerations.

Over recent decades, there has occurred a significant resurgence of historically-oriented and informed social science—though this still remains a sectional specialty rather than a general current. Inspired in the main by the pioneering legacies of Marx and Weber, this movement has been led by distinguished scholars such as Barrington Moore, Charles Tilly, Immanuel Wallerstein, Perry Anderson, Fernand Braudel, E.P. Thompson, Eric Hobsbawm, Eric Wolf, Marshall Sahlins, Theda Skocpol, John Hall, and Michael Mann. Directly challenging the traditional idiographic-nomothetic antinomy, and insisting upon the mutual and necessary interdependence of history and sociology, the work of these scholars is currently forcing a return to the contested and divisive issues of the earlier *Methodenstreite*, all of which were—and remain—keyed to the fundamental question of whether the social sciences are, or are not, inherently historical disciplines.

In critically assessing the merits and viability of the emerging transdisciplinary project of historical social science, this course will address the following thematic foci:

I. Philosophy of Science

- i. the ontology of the social-historical
 - * time and place as *constitutive mediums* of social life, intrinsic to both meaningful agency and processes of structuration
 - * the formation of minded selves, roles, institutions, and social orders as historical phenomena
 - * on causality and contexts
- ii. the epistemic foundations of historiography: critical realism or skeptical, postmodern “constructivism”?
 - * the past-as-it-happened and past-as-imagined, as ideologically reconstructed, commemorated
 - * the “historiographical operation” (Barthes, De Certeau, Hayden White)
 - * “arduous confrontations” of evidence and theory (E.P. Thompson)
- iii. levels of abstraction and concreteness in historical social science
 - * ideal types revisited - analytical vs. historical concepts

II. Historical Social Science as Theory

- i. the logic of contextual-sequential analysis
 - * the *via media* between transhistorical generalizations and particularistic narrations: social phenomena to be explicated by tracing both their genesis and their intrinsic relations to other mediating structures and processes
 - * history as part of the present, owing to the rootedness of present structural and cultural arrangements in past practices; of “chronotopes” and “trajectories”
- ii. concept-formation and historical-comparative generalization
 - * cases and the so-called “small N” problem
 - * excursus on the use of secondary sources
- iii. theorizing agency, structure, and culture as temporal phenomena
 - * on time and place as culturally defined apperceptions that provide essential frames of meaning for social action (i.e., the sequentially-ordered and site specific nature of most forms of reflexive agency)
 - * on path-dependence: present arrangements—institutions, cultural forms—are the cumulative and selectively reproduced products of past social actions, which in turn provide the basis for future endeavours and aspirations

III. Methods in Historical Social Science

- i. on historical evidence: remnants, records, residua
 - * typically clustered, catenated & so “narrative entailing”
 - * as objectifications of human intentionality, and thus characterized by “social authenticity” and

“implicative density” (or multivalence)

ii. hermeneutics and the “construction” of narratives

- * canons of interpretation, *verstehen*, and the hermeneutic circle
- * colligation, emplotment, rhetoric
- * on the integration of so-called “first-order” accounts (phenomenological or ideological representations by the agents themselves) and “second-order” synthesizing narratives that objectively situate and contextualize the subjective experiences of the actors
- * from “chaotic chronicle” to the narrative logic of situated social action (historical sociology)

iii. reflexive protocols for enhanced objectivity

- * source criticism
- * the sociology of knowledge and “epistemic vigilance”

To have mastered ‘theory’ and ‘method’ is to have become a self-conscious thinker... To be mastered by “method” or “theory” is simply to be kept from working, from trying, that is, to find out about something that is going on in the world. C. Wright Mills

The knowledge of fragments, studied by turns, each for its own sake, will never produce knowledge of the whole; it will not even produce knowledge of the fragments themselves. (la connaissance des fragments, étudiés successivement, chacun pour soi, ne procurera jamais celle du tout ; elle ne procurera même pas celle des fragments eux-mêmes) Marc Bloch

A critical survey and synthesis of major European reflections is Axel Honneth and Hans Joas, *Social Action and Human Nature*, 1988. Nicholas Thomas, *Out of Time: History and Evolution in Anthropological Discourse*, 1989, is incisive on the hazards of ahistorical analyses in ethnography. For economics, Paul David, “Why Are Institutions the ‘Carriers of History’? Path Dependence and the Evolution of Conventions, Organizations and Institutions,” *Structural Change and Economic Dynamics* 1994, 5/2: 205-20. The most instructive explorations to date of the structure-event dialectic are offered by Marshall Sahlins, most notably “Structure and History,” chap. 5 in his *Islands of History*, 1985, and “The Return of the Event, Again,” chap. XI in *Culture in Practice*, 2000. His most recent work, *Apologies to Thucydides: Understanding History as Culture and Vice Versa*, 2004, offers illuminating case studies. The foundational statement for the covering-law position is Carl Hempel, “Explanation in Science and History,” reprinted as chapter 4, pp.95-126, in Dray, *Philosophical Analysis and History*, 1966. Informative and revealing is the recent Sica-Mahoney debate: James Mahoney, “Revisiting General Theory in Historical Sociology,” *Social Forces*, 2004, 83/2: 459-89, and Alan Sica, “Why ‘Unobservables’ Cannot Save General Theory,” pp.491-501, which continues online with Mahoney, “Reply to Sica: Epistemological and Ontological Debates in Historical Sociology,” and Sica, “Reply to Mahoney’s Rebuttal: Hunting the Grail with Realist Enthusiasm.” Another debate treatment is Philip Gorski, “The Poverty of Deductivism: A Constructive Realist Model of Sociological Explanation,” and Jack Goldstone’s comments, “Response: Reasoning About History, Sociologically ...,” with Gorski’s short reply, “The Varieties of Deductivism,” all in *Sociological Methodology*, 2004. Still valuable is Blumer’s classic piece, “Sociological Analysis and the ‘Variable,’” *American Sociological Review*, 1956, 21/6: 683-90.

Emily Dickinson

*Description is revelation. It is not
The thing described, nor false facsimile.
It is an artificial thing that exists,
In its own seeming, plainly visible,
Yet not too closely the double of our lives,
Intenser than any actual life could be, ...*

Wallace Stevens, "Description without Place"

It is not sufficient for a theory to affirm no false relations; it must not hide true relations.

Henri Poincaré

Philosophy of science is, like all philosophies, not simply a rehearsal and recitation of what is done and said; it is also an analysis and an appraisal of the rationale and logical justification of scientists doing and saying what they do. Norwood Russell Hanson

The historical investigation of the development of a science is most needful, lest the principles treasured up in it become a system of half-understood precepts, or worse, a system of prejudices. Historical investigation not only promotes the understanding of that which now is, but also brings new possibilities before us by showing that what now exists is in great measure conventional and accidental.

Academic Integrity Clause

Any student caught engaging in such activities will be referred to the Dean's office for adjudication. Any student abetting or otherwise assisting in such misconduct will also be subject to academic penalties. Students are expected to cite sources in all written work and presentations. Accessibility Services

It is the University of Toronto's goal to create a community that is inclusive of all persons and treats all members of the community in an equitable manner. In creating such a community, the University aims to foster a climate of understanding and mutual respect for the dignity and worth of all persons. Please see the University of Toronto Governing Council "Statement of Commitment Regarding Persons with Disabilities" at <http://www.governingcouncil.utoronto.ca/Assets/Governing+Council+Digital+Assets/Policies/PDF/ppnov012004.pdf>.

In working toward this goal, the University will strive to provide support for, and facilitate the accommodation of individuals with disabilities so that all may share the same level of access to opportunities, participate in the full range of activities that the University offers, and achieve their full potential as members of the University community. We take seriously our obligation to make this course as welcoming and accessible as feasible for students with diverse needs. We also understand that disabilities can change over time and will do our best to accommodate you. Students seeking support must have an intake interview with a disability advisor to discuss their individual needs. In many instances it is easier to arrange certain accommodations with more advance notice, so we strongly encourage you to act as quickly as possible. To schedule a registration appointment with a disability advisor, please visit Accessibility Services at <http://www.studentlife.utoronto.ca/as>, call at 416-978-8060, or email at: accessibility.services@utoronto.ca. The office is located at 455 Spadina Avenue, 4th Floor, Suite 400.
